

FOR IMMEDIATE RELEASE

Montclair Breast Center Opens New Glen Rock Facility, Expanding Access to Proactive Breast Health Services

Hamilton, NJ, December 20, 2025 – Genesis Health, the healthcare division of Genesis Global Group, announces the opening of Montclair Breast Center at Glen Rock. This new Center extends Montclair Breast Center’s (MBC) longstanding commitment to personalized, multidisciplinary breast care by bringing its comprehensive services to more women across northern New Jersey.

Founded in 1989, Montclair Breast Center is a nationally recognized facility dedicated exclusively to breast wellness, breast cancer prevention, early detection and surgical treatment. MBC has been a leader in raising the standard of breast health through cutting-edge imaging, evidence-based screening protocols, and personalized risk-reduction strategies.

The Glen Rock location will offer the same high-level preventive and diagnostic services that have defined MBC’s reputation, including 3D mammography, ultrasound, clinical breast exams, genetic testing, individualized risk assessment and high-risk surveillance. The expansion supports MBC’s mission to deliver timely, accurate, and clinically-advanced care in an environment focused on comfort, dignity, and patient empowerment. Each location also offers bone density testing as part of a commitment to proactive women’s health.

The new center highlights the continued integration of Montclair Breast Center within Genesis Health, a division of Genesis Biotechnology Group, developed to deliver innovative women’s health services supported by molecular diagnostics, genetics, imaging, and data-driven clinical solutions.

“As CEO of Genesis Global Group, I am proud to see Montclair Breast Center extend its proactive, patient-centered model of breast health to Glen Rock. This new location reflects our long-term commitment to investing in comprehensive women’s health services that combine advanced diagnostics, personalized risk assessment, and compassionate care—delivered close to home for the women and families of northern New Jersey.” – Eli Mordechai, Ph.D., founder of Genesis Global Group (GGG) and Genesis Biotechnology Group (GGG)

The Glen Rock team of breast experts is now welcoming patients.

About Genesis Global Group
